Patients & Families

One App To Connect Them ALL
Services By MedWire
MedWire has created a fully customizable EMR software which is useful for doctors working independently, in polyclinics, or in multi/super speciality hospitals.
Using MedWire's innovative and user-friendly software, doctors can generate Online Smart Prescriptions and send these directly to the patient's app.

MedWire features a comprehensive appointment management system where patients can book online/offline appointments.

MedWire enables hospitals/clinics to send personalized notifications and promo codes to all MedWire users filtered by pincode.
MedWire can assist doctors better comprehend their patients' illnesses by giving them access to patient's medical data uploaded by patients themselves, their drug history as well as reports sent by various laboratories and can also view X-rays/CT/MRI/PET scans electronically.
Doctors can view and zoom in on all forms of radiological imaging using MedWire's revolutionary technology.
Why MedWire

- Online Smart Prescription
- Access to Patient’s EMR
- Appointment Booking System
- Digital Radiology
- Fast & Reliable
- Patient Insights
- Video Consultancy

One App To Connect Them ALL
Our Mission

MedWire's mission is to ensure that every single individual in India should have their own Electronic Medical Records stored securely, accessible from anywhere and at any time.

About Us

Founded in 2022, MedWire is Make in India’s first people led Electronic Medical Records (EMR) software. MedWire eliminates the burden of carrying stacks of medical files from hospital to hospital to simply having it all on your phone. We are creating a centralised hub by bringing together all Hospitals, Clinics, Medical Laboratories, Radiology facilities, across India to securely wire patient’s data to our cloud warehouse which is then accessible from anywhere and at any time. MedWire has created a unique technology for each of these healthcare entities to make EMR a norm to unfold India’s challenge of patient’s scattered medical data. We facilitate online booking of lab tests & radiology scans in your local area. We also connect doctors from across the country to patients from the comfort of their homes.
